viz under the two general heads a of
the molecular forces exerted by forms of
matter understood & those incorrectly
by our senses; and b. of molecular forces
exerted by forms of matter. under the
first of these heads are comprised I the
general phenomena of heat & of light and
II the general phenomena of Electricity &
magnetism. under the second general head
are comprised the phenomena of cohesion
& diffusion & II the phenomena of chemical
attraction & repulsion. The first two will be
the subjects of the first section & the two next
sections.
